The score range mentioned above, excluding the writing of Japanese as a Foreign Language, will not be given in the form of the raw score but on a common scale. The writing will be scored based on the standard.

#### (3) The Structure and Evaluation of Japanese as a Foreign Language

- a. Structure: The test in Japanese as a Foreign Language consists of writing, reading comprehension, and listening and listening-reading comprehension.
- b. Order and Time: The order of the examinations is writing (30 minutes), reading comprehension (40 minutes), listening-reading comprehension, and listening comprehension (about 55 minutes including listening-reading comprehension and listening comprehension).
- c. Score range: The score range 0-400 totaling reading 0-200, and listening comprehension and listening- reading comprehension 0-200, and the score range 0-50 for writing will be indicated.

#### (4) The Structure of Science

In the science area, according to the requirements of the university they want to enter and the course of study they want to pursue, **examinees have to select two subjects from physics, chemistry and biology on the examination day**. In case only one subject is selected, your answer for science will not be graded.

#### (5) The Structure of Mathematics

In the mathematics area, according to the requirements of the university they want to enter and the course of study they want to pursue, examinees have to select either Course 1 for liberal arts faculties or science faculties where comparatively less mathematics is required, or Course 2 for faculties where higher level mathematics is required on the examination day.

#### (6) Subject Test Syllabi

◆A syllabus for each subject test is posted on the JASSO website.

#### (7) Examination Language

The questions can be written in Japanese or English. (The examination of Japanese as a Foreign Language will be written only in Japanese.) Since the Japanese and English question booklets will be different, according to the requirements of the university they want to enter and the course of study they want to pursue, the examinee should notify which they prefer in the application.

#### (8) Answering Method

For Japanese as a Foreign Language, the answering methods are multiple-choice (mark-sheet) and writing (examinees are to actually write Japanese sentences.). For mathematics, science, Japan and the World, the method is the mark-sheet.

#### 2. University Requirements on Subject Test Selection

EJU scores earned over the past two years (results from a maximum of four sessions) remain valid. Please be aware that Japanese university requirements of examination subjects and languages regarding EJU vary according to each institution. While some universities (or some departments/courses) require international students to take specific subject tests of the examination, other universities (or departments/courses) do not require students to take the examination at all. Also, some universities accept only the results of the 1st session (June), while others accept only the results of the 2nd session (November). Certain universities and other institutions may designate the specific years and the number of exams that may be used when submitting applications. Therefore, before submitting your examination application, make sure you contact the university to which you will apply and ask about their latest requirements.

The list of schools offering "Pre-arrival Admission" is placed at the end of this book. (The "Pre-arrival Admission" is a system to secure admission to the higher educational institutions in Japan without having to go to Japan for the exam.) Please refer to it for selecting your school. Some of schools publish their acceptance level or minimum required scores. Please browse the JASSO website for details. In addition, the list of Japanese universities that use EJU scores for the selection of enrollees is posted on the JASSO website.

  - number of one session (whichever you prefer) on the university's application form. The scores submitted for respective subjects must be from the same session. Submitting the scores from different sessions for respective subjects e.g. "the score of Japanese as a Foreign Language for the 1st session and the score of Japan and the World for the 2nd session" is not acceptable.

- b. Some universities require students to have examination vouchers when applying, so **make sure** you do not lose your voucher before you have completed enrollment.
- c. After the examination, the university to which you applied will request JASSO to provide your score.
- d. JASSO will provide the university and others with your score and, if you took the Japanese as a Foreign Language test, a copy of your answers for the writing section of the test.
  - \*We will also notify your score to the organization in response to grade inquiries related to the selection of MEXT Scholarships for Malaysian Students and Japan-Taiwan Exchange Association Scholarship students.

#### (4) Inquiries on Results

JASSO does not respond to inquiries or doubts raised by examinees concerning the results reported to them. Also, JASSO does not show or return the answer sheets to examinees after the examination.

#### 12. Protection of Personal Information

JASSO will not disclose your personal information (your name, date of birth, country/region, address, photo, scores, answers, etc.) to any third party without your permission, except when reporting your scores to a university as you requested (see "11. Score Report: (3) Score Report to Universities"), or when disclosure is necessary to the administration of the EJU or the international students support projects to be conducted by JASSO or the government. However, upon inquiries from universities or other institutions regarding the scores of persons who have engaged in removal of examination questions from test sites in the past, proxy test-taking or other malicious prohibited behavior, notification may be made of the details of such prohibited acts.

- c. Numbers that are blackened too lightly or not neatly blackened will not be graded.
- d. When correcting incorrectly blackened numbers, completely them using a plastic eraser so that no traces of the pencil remain. Numbers that are not completely erased will not be graded. You must not use things such as white-out in place of an eraser.

#### (4) How to Answer for Japanese as a Foreign Language

#### The writing section

#### The reading section

- f. One of the row numbers 1, 2, 3, ... is provided for each question in the question booklets. These numbers are also printed on the answer sheets, so blacken the one appropriate answer choice
  - (1. to 4.) in the answer row with the same row number given in the corresponding question.

#### (Audio recording)

女子学生と男子学生が、待ち合わせの場所で話しています。この二人は、これからどうしますか。

女子学生 : あ,お待たせ。山田さんはまだ?

男子学生: うん。さっき連絡があって、ちょっと遅れるって。

待ってるって言ったんだけど, 先に行ってくれって。

女子学生 : でも,山田さん,研究会の場所,知ってるのかなあ?

男子学生 : 大丈夫だよ。先にどうぞって言ったんだから。

女子学生 : そう言ってるのなら、大丈夫ね。

この二人は, これからどうしますか。

1. 山田さんを待ってから行く。 2. 山田さんに先に行ってもらう。

3. 山田さんに連絡をする。 4. 山田さんより先に行く。

[Answer Sheet]

| 練 | 正しい   | 1 | 2 | 3 | 4 | - i | 練 | 正しい   | 1 | 2 | 3 |   |
|---|-------|---|---|---|---|-----|---|-------|---|---|---|---|
| 習 | 正しくない | 1 | 2 | 3 | 4 |     | 習 | 正しくない |   |   | • | 4 |

The correct answer is 4, so mark the answer number 4 in the "Correct" row on the answer sheet. You must also mark the numbers 1, 2, 3 in the "Incorrect" row.

#### (5) How to Answer for Science

- a. Science consists of "physics", "chemistry" and "biology". There is one booklet for science. Select at the examination 2 subjects from "physics", "chemistry" and "biology" on the examination day.

  In case only one subject is selected, your answer for science will not be graded.
- b. The answer sheet for science is double sided, so use each side to answer the questions for only one subject.
- c. At the top of the middle of the answer sheet there is a space to select the subject you will answer. (For science, this is at the top of both sides of the answer sheet.) Blacken the space with the corresponding subject.

If the selected subject is not blackened, your answers will not be graded.

[Correct Example] When using the front side for "physics" and the reverse side for "chemistry" Front Side

[Incorrect Example] When selecting physics and chemistry Front Side

\* Even if you fill in the oval under the name of subject on the front side of the answer sheet, if you forget to fill in the same part on the reverse side, both the front and reverse answers will not be graded.

#### (7) How to Answer for Mathematics

- a. Mathematics consists of "Course 1" and "Course 2". There is one booklet for mathematics. Select at the examination either "Course 1" or "Course 2" on the examination day.
- b. At the top of the middle of the answer sheet there is a space to select the course you will answer. Blacken the space with the corresponding course. If you do not blacken the selected course, your answers will not be graded.

- c. Be careful because choices for the mathematics questions begin with a minus sign (-) while choices for other subjects begin with  $012\cdots$ .
- d. The questions use letters ( A, B, C ···) as answer keys. The answer sheets are also printed with these keys, so blacken the appropriate numeral ( from 0 to 9 ) or minus sign (—) for each key corresponding to the same key in the questions.
- e. The answer sheet has rows lettered from **A** to **Z**, but you may not need to use all of them. Use only the answer rows needed to completely answer the questions, and leave the remaining answer rows blank.
- f. In mathematics, there are two types of questions. In one type, you substitute a numeral or a minus sign for each answer key (letter); in the other type, you select the appropriate answer from several choices
- g. For questions where the answer requires a number or the minus sign (—), since each of the denotation letters corresponds to a number from 0 to 9 or the minus sign (—), blacken the answer in the space specified.

h. The actual number of choices given for some multiple choice questions may be less than the number of choices printed on the answer sheet. In such cases, ignore the unused choices in the answer row.
